

CAMILO SÁNCHEZ

UEFN / VERSE GAMEPLAY DEVELOPER | TECHNICAL ARTIST

Colombia | +57 318 381 7534 | cmilo1269@gmail.com | [cmilo1357.github.io](https://github.com/cmilo1357)

PROFILE

UEFN Developer and Technical Artist with hands-on experience independently developing and shipping five Fortnite islands from concept to release. Builds modular, event-driven Verse systems spanning progression, economy, jobs, housing, quests, UI, and persistence. Combines gameplay engineering with real-time VFX, materials, tool development, debugging, performance optimization, and technical art workflows. Experienced in end-to-end island development, including gameplay implementation, visual polish, publishing, and the creation of audiovisual content such as trailers and promotional material.

CORE EXPERTISE

VERSE & UEFN Gameplay architecture, event-driven systems, per-player state, persistence, async flows, parametrics/generics, effects, reusable devices, debugging, memory and performance optimization

GAMEPLAY & UI Progression and economy, jobs and objectives, quests, multiplayer systems, UMG, Verse UI, banking, shops, inventories, and player-facing feedback

TECHNICAL ART & TOOLS Unreal Engine 4/5, Niagara VFX, materials and shaders, HLSL, Blender, Maya, Substance Designer, Photoshop, After Effects, C#, Lua, ClickUp

EXPERIENCE

UEFN / VERSE GAME DEVELOPER / INDEPENDENT

JAN 2024 - PRESENT

- Released five Fortnite islands while owning gameplay programming, level design, QA, UI, VFX, 3D art, publishing, and promotional content from concept through launch.
- Developed games across multiple styles, including extraction shooters, box fights, arena fights, roguelikes, and tycoons, adapting gameplay systems and progression to distinct core loops.
- Designed isolated per-player runtimes and event-driven managers for economy, experience, jobs, modifiers, input, UI, audio, and persistent profile data.
- Built reusable systems for job contracts and objectives, housing upgrades, home activities, quests, shops, banking, inventories, and in-island transactions.
- Implemented UMG/Verse UI and asynchronous interactions; created parametric event utilities and effect-aware APIs to keep gameplay systems decoupled and maintainable.
- Profiled and optimized experiences across devices, materials, Niagara VFX, streaming, and data layers within UEFN memory and performance constraints.

TECHNICAL ARTIST / ON3D STUDIOS

JUN 2023 - JUN 2024

Junior Technical Artist - Dec 2023 - Jun 2024 | Technical Artist Intern - Jun 2023 - Nov 2023

- Owned the ideation and production of real-time visual effects designed to communicate gameplay clearly.
- Collaborated closely with developers to integrate effects, iterate on mechanics, and solve technical issues.
- Created tools and workflows that streamlined recurring tasks for the art team.
- Validated and optimized effects against project performance requirements.

EDUCATION & TRAINING

B.ENG. IN DIGITAL ENTERTAINMENT DESIGN / Universidad Pontificia Bolivariana / 2019 - 2024

VFX APPRENTICE / Stylized 2D/3D Visual FX / 2023 - 2024

ADDITIONAL COURSEWORK / Niagara VFX for UE5; VFX for Games in UE4 / Udemy, 2022 - 2023
